

SANTHOSH KUMAR S

Java Full Stack Developer — Fresher

Chennai, Tamil Nadu | +91 93844 89297 | ssanthoshkumar7094@gmail.com

linkedin.com/in/s-santhosh-kumar-649962368 | github.com/Santhoshkumar5713

PROFESSIONAL SUMMARY

Enthusiastic Java Full Stack Developer fresher with hands-on experience building secure, production-grade web applications using Java, Spring Boot, Spring Security, JWT, React.js, and MySQL. Built a Secure Digital Banking System with transaction monitoring — applying Java 8 Streams, Lambda, Multithreading, and role-based JWT authentication. Certified in Full Stack Java (FITA Academy) with exposure to SOA/microservices, Hibernate ORM, and REST APIs. Exploring Docker and CI/CD.

TECHNICAL SKILLS

Full Stack: Java, J2EE, Spring Boot, Spring Security, JWT, Spring MVC, Hibernate ORM, MySQL

Core Java: OOP, Collections (List/Map/Set), Exception Handling, Multithreading, Java 8 (Streams, Lambda)

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3 — responsive, mobile-ready design

Architecture: SOA / Microservices basics, REST API design, MVC, Component-based UI, DI pattern

Database: MySQL — schema design, joins, CRUD, relational DB concepts, SQL queries

PROJECT EXPERIENCE

Online Shopping System Java · Spring Boot · MySQL · REST API · Postman

Backend Web Application | 2024 | github.com/Santhoshkumar5713

- Developed a full-stack e-commerce application using Spring Boot backend REST APIs and React.js frontend, following SOA/microservices principles with 5+ normalized MySQL tables via Hibernate ORM
- Applied Spring MVC layered architecture (Controller → Service → Repository) for maintainable code; validated all API endpoints end-to-end with Postman including mock testing
- Built React.js frontend components consuming backend APIs, delivering a responsive, mobile-ready UI — maintained on GitHub with structured branching and commits

Secure Digital Banking System with Transaction Monitoring Java · Spring Boot · Spring Security · JWT · MySQL · REST API · Multithreading

Backend Security Project | 2024 | github.com/Santhoshkumar5713

- Built a full-stack secure digital banking system with Spring Boot REST APIs (backend) and React.js UI (frontend), featuring JWT-secured endpoints and real-time transaction monitoring dashboard
- Implemented Spring Security with JWT and role-based access control — protecting admin and user routes, enforcing authentication on all sensitive banking API endpoints
- Applied Java 8 Streams, Lambda, and Collections (List, Map, Set) for transaction filtering, reporting, and account data aggregation across multiple user accounts
- Used Multithreading for concurrent transaction processing and @ControllerAdvice for centralized exception handling — improving API reliability and error traceability

EDUCATION

Bachelor of Computer Applications (BCA)

Vel Tech Ranga Sanku Arts & Science College, Madras University | CGPA: 6.5/10 | May 2025

CERTIFICATIONS

Master Full Stack in Java — FITA Academy

- Intensive training: Core Java, OOP, Collections, Streams, Lambda (Java 8), Spring Boot, Spring Security, JWT, MySQL & REST API through real-world project builds.
